#### FUEL OIL, RMK 500 HS

H	azard Statement(s)	<ul> <li>H304: May be fatal if swallowed and enters airways.</li> <li>H332: Harmful if inhaled.</li> <li>H350: May cause cancer.</li> <li>H361d: Suspected of damaging the unborn child.</li> <li>H373: May cause damage to organs through prolonged or repeated exposure: Thymus, Liver, blood effects</li> <li>H410: Very toxic to aquatic life with long lasting effects.</li> </ul>
Pi	recautionary Statement(s)	<ul> <li>P201: Obtain special instructions before use.</li> <li>P260: Do not breathe dust/fume/gas/mist/vapours/spray.</li> <li>P281: Use personal protective equipment as required.</li> <li>P301+P310: IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.</li> <li>P331: Do NOT induce vomiting.</li> <li>P273: Avoid release to the environment.</li> </ul>
S	upplemental information	EUH066: Repeated exposure may cause skin dryness or cracking.
6 O	ther hazards	Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances. Remove contaminated clothing and wash clothing before reuse. Vapour may create explosive atmosphere. The vapour is heavier than air;

#### SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances

2.3

SUBSTANCE	CAS No.	EC No.	%W/W
Fuel oil, residual	68476-33-5	270-675-6	100

beware of pits and confined spaces.

#### **SECTION 4: FIRST AID MEASURES**

4.1	Description of first aid measures	
	Self-protection of the first aider	The vapour is heavier than air; beware of pits and confined spaces. If it is suspected that fumes are still present, the responder should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Avoid all contact. Do not ingest. If swallowed then seek immediate medical assistance.
	H2S Warning:	Hydrogen sulphide (H2S) can accumulate in the headspace of storage tanks and reach potentially hazardous concentrations. If there is any suspicion of inhalation: A self contained breathing apparatus
		should be worn. Remove to fresh air immediately.
	Inhalation	IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. If symptoms persist, obtain medical attention.
	Skin Contact	IF ON SKIN (or hair): Remove contaminated clothing immediately and drench affected skin with plenty of water, then wash with soap and water. If irritation (redness, rash, blistering) develops, get medical attention.
	Eye Contact	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice/attention.
	Ingestion	IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the lungs. If vomiting occurs spontaneously, keep head below hips to prevent

# Vitol Bunkers

#### FUEL OIL, RMK 500 HS

- 4.2 Most important symptoms and effects, both acute and delayed
- 4.3 Indication of any immediate medical attention and special treatment needed

Notes to a physician:

aspiration into the lungs. If unconscious, place in recovery position and get medical attention immediately. Do not give anything by mouth to an unconscious person. Get medical attention immediately. Do not wait for symptoms to appear. Inhalation: Vapour may be irritant to the respiratory tract.

Skin Contact: Repeated and/or prolonged skin contact may cause irritation. Eye Contact: May cause eye irritation.

Ingestion: Aspiration hazard. Aspiration into the lungs may cause chemical pneumonitis, which can be fatal.

If breathing is laboured, oxygen should be administered by qualified personnel. In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).

IF INHALED: If unconscious, place in recovery position and get medical attention immediately. Administer oxygen if available and artificial respiration if necessary.

IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the lungs. If aspiration is suspected obtain immediate medical attention. If vomiting occurs spontaneously, keep head below hips to prevent aspiration into the lungs.

#### SECTION 5: FIREFIGHTING MEASURES

5.1	Extinguishing media	
	Suitable Extinguishing media	
	Unsuitable extinguishing media	
52	Special bazards arising from the substa	

5.2 Special hazards arising from the substance or mixture Foam, Carbon dioxide, Water fog or dry powder.

Do not use water jet. Direct water jet may spread the fire.

Not flammable but will support combustion. The vapour is heavier than air; beware of pits and confined spaces. Will float and can be reignited on surface water. Decomposes in a fire giving off toxic fumes: A mixture of solid and liquid particulates and gases including unidentified organic and inorganic compounds. If sulphur compounds are present in appreciable amounts, combustion products may include also H2S and SOx (sulfur oxides) or sulfuric acid

5.3 Advice for fire-fighters

Fight fire with normal precautions from a reasonable distance. Fire fighters should wear complete protective clothing including self-contained breathing apparatus. Keep containers cool by spraying with water if exposed to fire. Avoid release to the environment. Dike fire control water for later disposal.

SECTION 6: ACCIDENTAL RELEASE MEASURES			
6.1	Personal precautions, protective equipment and emergency procedures	Caution - spillages may be slippery. Ensure operatives are trained to minimise exposures. Ensure suitable personal protection during removal of spillages. Eliminate sources of ignition. Shut off leaks if without risk. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid all contact with substance. Ensure adequate ventilation. Do not breathe vapour. Do not ingest. If swallowed then seek immediate medical assistance. Do not use sparking tools.	
	H2S Warning:	Product may release Hydrogen Sulphide. Exposure controls - These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training. Please see section 8 for appropriate personal protection equipment	
	Small spillages:	Wear flame-resistant antistatic protective clothing.	
	Large spillages:	Evacuate the area and keep personnel upwind. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. Avoid all contact. Wear chemical protection suit and breathing apparatus. See Also Section: 8.	
6.2	Environmental precautions	Avoid release to the environment. Do not allow to enter drains, sewers or watercourses. Spillages or uncontrolled discharges into watercourses must be alerted to the Environment Agency or other appropriate regulatory body. If necessary: Dike area to contain the spill and prevent releases to sewers, drains, or other waterways.	
6.3	Methods and material for containment and cleaning	Provided it is safe to do so, isolate the source of the leak. The vapour is heavier	
	up	than air; beware of pits and confined spaces. Ensure that the equipment is

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

# **Vitol**Bunkers

#### FUEL OIL, RMK 500 HS

	adequately grounded. Allow small spillages to evaporate provided there is adequate ventilation.
Spillages onto land:	In case of soil contamination, remove contaminated soil and treat in accordance with local regulations. Adsorb spillages onto sand, earth or any suitable
	adsorbent material. Transfer to a lidded container for disposal or recovery.
	Dispose of this material and its container as hazardous waste.
	Small spillages: Allow small spillages to evaporate provided there is adequate
	ventilation. Wear flame-resistant antistatic protective clothing.
	Large spillages: Cover spillage with foam to reduce evaporation. Do not use water jet.
Spillages on water or at sea:	Collect as much as possible in clean container for reuse or disposal.
	Small spillages: Contain product with floating barriers or other equipment.
	Collect spilled product by absorbing with specific floating absorbents.
	Large spillages: Open waters should be contained with floating barriers or
	other mechanical means and recovered, only if this is strictly necessary and if
	fire/explosion risks can be adequately prevented. Otherwise control the
	spreading of the spillage, and let the substance evaporate naturally.
Reference to other sections	See Section: 8.13
Reference to other sections	

#### **SECTION 7: HANDLING AND STORAGE** 7.1 Precautions for safe handling Obtain special instructions before use. Keep away from sources of ignition - No smoking. Use only outdoors or in a well-ventilated area. Prevent vapour build up by providing adequate ventilation during and after use. Take action to prevent static discharges. Use non-sparking tools. All parts of the plant and equipment should be electrically bonded together and connected to earth. Electrical continuity should be checked at regular intervals. Antistatic clothing and footwear should be used. The vapour is heavier than air; beware of pits and confined spaces. Avoid all contact with substance. Do not ingest. If swallowed then seek immediate medical assistance. Do not breathe vapour. See Section: 8. Keep good industrial hygiene. Wash hands thoroughly after handling. Contaminated clothing should be thoroughly cleaned. H2S Warning: Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances. These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training. 7.2 Conditions for safe storage, including any Light hydrocarbon vapours can build up in the headspace of containers. These incompatibilities can cause flammability / explosion hazards. Bund storage facilities to prevent soil and water pollution in the event of spillage. Keep only in original packaging. Keep containers properly sealed when not in use. Protect from sunlight. Containers of this material may be hazardous when empty since they retain product residue. Empty container may contain product residue which may result in flammable or explosive vapours inside the container. Storage temperature Stable at ambient temperatures. Storage measures Suitable containers: Stainless steel, Mild steel Unsuitable containers: Synthetic materials Incompatible materials Keep away from oxidising agents. 7.3 Specific end use(s) See Section: 1.2 and/or Exposure Scenario.

#### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters

8.1.1 Occupational Exposure Limits

No Occupational Exposure Limit assigned. Users are advised to consider national Occupational Exposure Limits or other equivalent values.

8.1.2 Biological limit value

Not established.

Date: 30.04.2021

# **Vitol**Bunkers

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

#### FUEL OIL, RMK 500 HS

#### 8.1.3 PNECs and DNELs

PNEC: Fuel Oil, Residual is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Fuel Oil, Residual Derived No Effect Level	Oral	Inhalation	Dermal
Worker - Long Term - Systemic effects	0.015 mg/kg bw/day	0.18 mg/m <sup>3</sup>	0.065 mg/kg bw/day
Worker - Short term - Systemic effects	-	4700 mg/m³	-

#### 8.2 **Exposure controls** 8.2.1 Appropriate engineering controls Provide adequate ventilation, including appropriate local extraction if dusts, fumes or vapours are likely to be evolved. Store in a cool/low-temperature, wellventilated (dry) place away from heat and ignition sources. Guarantee that the eye flushing systems and safety showers are located close to the working place. 8.2.2 Individual protection measures, such as personal Protective clothing should be selected specifically for the working place, protective equipment (PPE) depending on concentration and quantity of the hazardous substances handled. The resistance of the protective clothing to chemicals should be ascertained with the respective supplier. Fuels are typically used, transferred and transported in closed systems. If exposure is likely (i.e. during sampling) the following advice may be appropriate. Keep good industrial hygiene. Always wash hands before smoking, eating and drinking. Do not eat, drink or smoke at the work place. Refer to annexes for exposure scenarios detailing use specific exposure controls Eye/ face protection Use eye protection according to EN 166, designed to protect against liquid splashes. Hand protection: Wear impervious gloves (EN374). Gloves should be changed Skin protection regularly to avoid permeation problems. Breakthrough time of the glove material: refer to the information provided by the gloves' producer. Recommended: Nitrile rubber. Body protection: Wear anti-static clothing and shoes. small scale: Wear suitable coveralls to prevent exposure to the skin. large scale: Chemical protection suit. Respiratory protection When the product is heated /In case of inadequate ventilation wear respiratory protection. The use of a high efficiency filter (EN143) is recommended. Filter type A2 Closed system(s): Not normally required. Thermal hazards Not applicable. 8.2.3 **Environmental Exposure Controls** Avoid release to the environment.

#### SECTION 10: STABILITY AND REACTIVITY

10.1	Stability and reactivity	Stable under normal conditions. Reacts with - Strong oxidising agents
10.2	Chemical stability	Stable under normal conditions. Hazardous polymerisation will not occur.
		Product may release Hydrogen Sulphide.
10.3	Possibility of hazardous reactions	Vapours are heavier than air and may travel considerable distances to a source
		of ignition and flashback. Product may release Hydrogen Sulphide.
10.4	Conditions to avoid	Elevated temperature: > 50 °C
		Keep away from heat, sources of ignition and direct sunlight.
10.5	Incompatible materials	Keep away from oxidising agents. Strong Acids and Alkalis.
10.6	Hazardous decomposition product(s)	A mixture of solid and liquid particulates and gases including unidentified
		organic and inorganic compounds. Decomposes in a fire giving off toxic fumes:
		COx, H2S, SOx,

#### **SECTION 11: TOXICOLOGICAL INFORMATION**

11.1	Information on toxicological effects	All test data taken from existing ECHA registrations for the substances mentioned.
	Acute toxicity - Ingestion	Based upon the available data, the classification criteria are not met.
		LD50 (oral,rat) mg/kg: >2000 (OECD 401)
	Acute toxicity - Inhalation	Acute Tox. 4; Harmful if inhaled.
		LC50 (inhalation,rat) mg/l/4h: 4.1 (EPA OTS 798.1150)
	Acute toxicity - Skin Contact	Based upon the available data, the classification criteria are not met.
		LD50 (skin,rabbit) mg/kg: >2000 (OECD 434)
	Skin corrosion/irritation	Based upon the available data, the classification criteria are not met.
		Not irritating to skin. (rabbit) (OECD 404)
		EUH066: Repeated exposure may cause skin dryness or cracking. (rat) (OECD
		410)
	Serious eye damage/irritation	Based upon the available data, the classification criteria are not met.
		Not irritating to eyes. (rabbit) (EU Method B.5)
	Respiratory or skin sensitization	Based upon the available data, the classification criteria are not met.
		Sensitisation (guinea pig) - Negative (OECD 406)
	Germ cell mutagenicity	Based upon the available data, the classification criteria are not met.
		ECHA Registration Endpoint summary:
		Not classified. Studies showed no consistent evidence of mutagenic activity.
	Carcinogenicity	Carc. 1B; May cause cancer.
		ECHA Registration Endpoint summary:
		Positive (mouse)
	Reproductive toxicity	Repr. 2; H361d: Suspected of damaging the unborn child.
		ECHA Registration Endpoint summary:
		Reproductive toxicity: Negative
		Developmental toxicity: Positive

#### **SECTION 13: DISPOSAL CONSIDERATIONS**

13.1 Waste treatment methods

Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point. Disposal should be in accordance with local, state or national legislation. Containers of this material may be hazardous when empty since they retain product residue. Containers must not be punctured or destroyed by burning, even when empty. Allocation of a waste code number, according to the European Waste Catalogue, should be carried out in agreement with the regional waste disposal company. Waste code: Fuel Oil (13 07 01)

#### FUEL OIL, RMK 500 HS

#### Exposure Scenario 1 – Distribution of Fuel oil, residual

1.0 Contributing scenarios	
Sector of Use [SU]	SU3 Industrial uses: Uses of substances as such or in preparations at industrial sites
Process Category [PROC]	PROC1 PROC2 PROC2 (Storage) PROC2 (Sampling) PROC3 PROC8a (Maintenance) PROC8b (Marine) PROC8b (Marine)
Chemical Product Category [PC]	PROC15 Not applicable
Article Categories [AC]	Not applicable
Environmental Release Categories [ERC]	ERC4 ERC5 ERC6a ERC6b ERC6c ERC6d ERC7
Specific Environmental Release Categories [SPERC]	ESVOC SpERC 1.1b.v1

.1 Control of worker exposure						
Product characteristics						
hysical form of product	Liquid					
apour pressure	<0.5 kPa @ STP					
Concentration of substance in product	Covers percentage substance	in the product up to 100 % (unless stated differently).				
luman factors not influenced by risk n	nanagement					
otential exposure area	Not defined					
requency and duration of use	·					
	PROC1, PROC8a	Covers daily experience up to 8 hours (uplace stated differently)				
	(Maintenance), PROC15	Covers daily exposures up to 8 hours (unless stated differently).				
vegeure duration par day	PROC2 (Storage), PROC3,	Covers exposure up to 1 - 4 hour(s)				
Exposure duration per day	PROC8b (Marine)					
	PROC8b (Road/Rail)	Covers exposure up to 15 min - 1 hour(s)				
	PROC2, PROC2 (Sampling)	Covers exposure up to 15 min				
mission days (days/year):	300					
Other operational conditions affecting	worker exposure					
rea of use	PROC2 (Sampling)	Outdoor				
liea of use	All other PROC's	Not defined (default = Indoor)				
haracteristics of the surroundings	Not defined	·				
General measures applicable to all act	ivities					
ssumes a good basic standard of occup	ational hygiene is implemented. Ass	nal hygiene is implemented. Assumes activities are at ambient temperature (unless stated differently).				
General measures (carcinogens)						
consider technical advances and process	s upgrades (including automation) for	or the elimination of releases. minimise exposure using measures such				
s closed systems, dedicated facilities ar	nd suitable general/local exhaust ve	ntilation. Drain down systems and clear transfer lines prior to breaki				
ontainment. Clean/flush equipment, wh	ere possible, prior to maintenance	Where there is potential for exposure: restrict access to authorise				

respiratory protection when its use is identified for certain contributing scenario; clear up spills immediately and dispose of waste safely. Ensure safe systems of work or equivalent arrangements are in place to manage risks. Regularly inspect, test and maintain all control measures. Consider the need for risk based health surveillance.

#### Technical conditions of use

PROC1, PROC2, PROC2 (Storage),	Handle substance within a closed system.
--------------------------------	--

Date: 30.04.2021

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

# **Vitol**Bunkers

PROC3			
PROC8b (Road/Rail)	Ensure material tra	ansfers are	under containment or extract ventilation (Efficiency of at least 80%)
PROC15	Handle in a fume	cupboard or	under extract ventilation. (Efficiency of at least 90 %).
Organisational measures			
PROC2; PROC3	Sample via a close	ed loop or ot	ther system to avoid exposure.
PROC8b (Marine)			lear transfer lines prior to de-coupling.
PROC8a (Maintenance)	Drain down and flu	ush system p	prior to equipment break-in or maintenance.
PROC8a (Maintenance), PROC8b (Marine)	Retain drain down	s in sealed s	storage pending disposal or for subsequent recycle.
PROC8b (Road/Rail)	Ensure material tra	ansfers are	under containment or extract ventilation
Risk management measures related to hu	ıman health		
Respiratory protection	No special measu		ired.
Hand and/or Skin protection	PROC1, PROC2, (Storage), PROC2 (Sampling), PROC PROC8b (Marine) (Road/Rail)	<u>2</u> C3,	Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training.(Efficiency of at least 90 %).
	PROC15		Wear suitable gloves tested to EN374. (Efficiency of at least 80 %).
	PROC8a (Mainter	nance)	Wear chemically resistant gloves (tested to EN374) in combination with specific activity training. (Efficiency of at least 75%)
Eye Protection	No special measu	res are requ	ired.
2.2 Control of environmental exposure			
Amounts used		1	
Fraction of EU tonnage used in region:		0.1	
Regional use tonnage (tons/year):		9.3E+06	
Fraction of Regional tonnage used locally (to	ons/year):	2.0E-03	
Annual site tonnage (tons/year):		1.9E+04	
Maximum daily site tonnage (kg/day):		6.2E+04	
Environment factors not influenced by ris	sk management		
Flow rate of receiving surface water (m <sup>3</sup> /d):		Not define	ed (default = 18,000)
Local freshwater dilution factor:		10	
Local marine water dilution factor:		100	
Operational conditions			
Emission days (days/year):		300	
Release fraction to air from process (initial re RMM):	•	1.0E-04	
Release fraction to wastewater from process to RMM):		1.0E-06	
Release fraction to soil from process (initial n RMM):		1.0E-05	
Technical conditions and measures at pr		-	
Common practices vary across sites thus co			
Technical onsite conditions and measure		-	
			primarily ingestion). No wastewater treatment required.
Treat air emission to provide a typical remov		90	
Treat onsite wastewater (prior to receiving w provide the required removal efficiency of (%	»):	0	
If discharging to domestic sewage treatment required onsite wastewater removal efficience		0	
Treat soil emission to provide a typical remo	val efficiency of (%):	Not define	ed
Organisational measures to prevent/limit			
Do not apply industrial sludge to natural soils	s. Sludge should be in	ncinerated, c	ontained or reclaimed.
Conditions and measures related to mun	· · ·	ient plant	
Size of municipal sewage system/treatment	plant (m³/d):	2.0E+03	
Degradation effectiveness (%):		94.2	
Conditions and measures related to exten	rnal treatment of was	ste for disp	osal
External treatment and disposal of waste she	ould comply with appl	icable local a	and/or national regulations.
Conditions and measures related to exten			
External recovery and recycling of waste sho	ould comply with appli	cable local a	and/or national regulations.
Substance release quantities after risk m	anagement measure		
Release to waste water from process (mg/l):		Not define	d

Maximum allowable site tonnage (MSafe) based on release

following total wastewater treatment removal (kg/d):

Assumes a good basic standard of occupa	ational hygiene is implemented. As	ssumes activities are at ambient temperature (unless stated differently).
General measures (carcinogens)		

Consider technical advances and process upgrades (including automation) for the elimination of releases. minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean/flush equipment, where possible, prior to maintenance Where there is potential for exposure: restrict access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenario; clear up spills immediately and dispose of waste safely. Ensure safe systems of work or equivalent arrangements are in place to manage risks. Regularly inspect, test and maintain all control measures. Consider the need for risk based health surveillance.
